SOLAR
ROOFTOP
EPC
SOLUTION

WHY SOLAR ROOFTOP?

- Environment Friendly
- Clean Renewable Energy
- No Fossil Fuel Required
- Reduces Carbon Footprint

- Save On Electricity Bill
- Tax Savings By Accelerated Depreciation
- Relief from inflating electricity prices
- Reduce Energy Dependency
- Revenue Generation By Feeding Extra Electricity To Grid
- No Recurring Cost
- High Return On Investment

OTHER BENEFITS

- Solar Panel With 25 Years Warranty
- Easy Installation
- No Moving Parts
- Very Minimal Maintenance
- Reduces Voltage Fluctuation

SOLAR ROOFTOP EPC SOLUTIONS

SOLAR POWER BUSINESS MODELS

We offer two major business models for On-Grid Solar Power Solutions

On-Grid capex Model

The solar plant is setup & maintained by an investor wherein the end user purchases the electricity at cheaper rates than grid electricity, under a Power Purchase Agreement.

On-Grid OPEX Model

The solar plant is asset of the end user and is setup using own funds or bank finance. The end user enjoys cheaper electricity & other social & financial benefits.

OFF-GRID SOLAR SOLUTIONS

Off-Grid Solar Solutions are available for areas where grid connected power supply is either not available or possible and it helps to reduce diesel generator cost. For ex. Solar Water Pump, Solar Lighting Solutions for Indoors & Outdoors, etc.

WHY Surya Urja

Trusted & Reliable

The company is ISO certified to ensure best management practices

Superior Technical Expertise

In-house dedicated engineers & technical team ensures best services

Strong Execution Capability

Expertise of fifteen years and 350+ successfully completed solar projects

Long Term Continuous Support

From consultation to execution & maintenance, we ensure un-compromised support

Experienced Management

Company peers from various technical & management background ensures best product delivery

Surya Urja delivers rooftop solar solutions to promote global sustainable development. Through constant innovation, we continue to push the solar industry forward by creating greater grid parity of solar power and popularizing renewable energy. Our mission is to boost global renewable energy development around the world for the benefit of all of humanity.

We are on a mission to provide top end quality services in EPC, from the initial conceptualization & design stage to the installation & commissioning along with comprehensive maintenance, we deploy, world class solar technology to deliver affordable solar power. We offer efficient rooftop solar solutions that are easy to install, operate and offer cost effective access to solar energy.

“Surya Urja brings on board a total experience of over fifteen years in renewable energy sector and have a portfolio totalling over 350 various solar projects.”
